Subject: RE: 005/OW/SER - 10: Request For Comments Section 36 & Marine Licence Application Inch Cape Offshore Limited: 24 July 2013

Dear Sir/Madam,

Having reviewed the ES, EIA and associated Annexes provided for the proposed Inch Cape Offshore Wind Farm, the Civil Aviation Authority confirms appropriate aviation consultees have been identified and initial consultation has been done. However, the official position of all aviation stakeholders mentioned in the reports regarding the proposed development should be established. The report correctly discusses the potential impact that wind turbines have on the communications, navigation and surveillance infrastructure and also that turbines can cause a physical obstruction to aviation stakeholders which should be taken into account.

If the proposed development is approved, I would add the need to inform the Defence Geographic Centre icgdgc-aero@mod.uk of the locations, heights and lighting status of the turbines and meteorological masts, the estimated and actual dates of construction and the maximum height of any construction equipment to be used, prior to the start of construction, to allow for the appropriate inclusion on Aviation Charts, for safety purposes.

Kind regards,
