

HEALTH & SAFETY RISK ASSESSMENT
 The consideration of hazard and risk was integral with our design process and therefore we have not highlighted any areas of concern which a competent installer or maintenance could not reasonably expect to know.
DESIGN NOTES
 1. All structures shall be designed in line with current standards.
 2. All structures shall be designed in line with current standards.
 3. All structures shall be designed in line with current standards.
 4. All structures shall be designed in line with current standards.
 5. All structures shall be designed in line with current standards.
 6. All structures shall be designed in line with current standards.
 7. All structures shall be designed in line with current standards.
 8. All structures shall be designed in line with current standards.
 9. All structures shall be designed in line with current standards.
 10. All structures shall be designed in line with current standards.
