- Woodland

#### Zone of Theoretical Visibility

Final Design Layout  
(187m height  
above LAT)

Consented Layout  
(194.8m height  
above LAT)

This drawing is based upon computer generated Zone of Theoretical Visibility (ZTV) studies. The areas shown are the maximum theoretical visibility, taking into account topography, principal woodlands and settlements. The model does not take into account any localised features such as small copses, hedgerows, mature trees or buildings and therefore gives an exaggerated impression of the extent of visibility. The actual visibility on the ground will be noticeably less than that suggested by this plan and visibility from principal settlements is likely to be possible from peripheral areas only.

The ZTV includes an adjustment that allows for the Curvature and Light Refraction of the Earth and has a 25m<sup>2</sup> resolution, resampled from Ordnance Survey Terrain 5 data combined with Nextmap 25m obstruction data.

No dimensions are to be scaled from this drawing. All dimensions are to be checked on site. Area measurements for indicative purposes only. Data received from LDA Design 2013. OS Open data © Crown copyright and database right 2013 Reference number 0100031673.
