

# Hywind Scotland UXO Clearance – One pager

- Purpose of campaign: - To verify and dispose UXO targets found within the Hywind Scotland construction area
- Time of survey: - In the period of September 2016, dependent on approval of Marine Licences
- Schedule: - Total time for offshore campaign is estimated to approx 2 weeks, depending on number of targets
- Equipment: - Offshore vessel with ROV
- Working area: - 50m wide corridor along power cable route (26km) from Peterhead to Buchan deep.  
- Wind Park at Buchan deep.
- Contractor: - Swedish survey company MMT AB, with vessel Edda Fonn.
- Description of work:

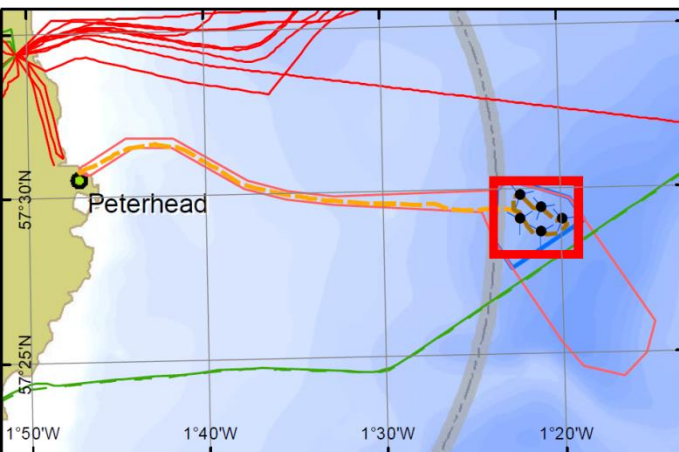

One offshore vessel (Edda Fonn) will investigate the Targets found during the UXO survey, by ROV.

An UXO risk management consultant will be onboard, advising on what targets shall be disposed.

Disposal of confirmed UXO's or UXO related debris, will then be undertaken by subcontracted UXO disposal experts, assisted by vessels ROV for placing charges.

A post disposal inspection/survey will be carried out, and an ALARP certificate shall be issued for the relevant areas.

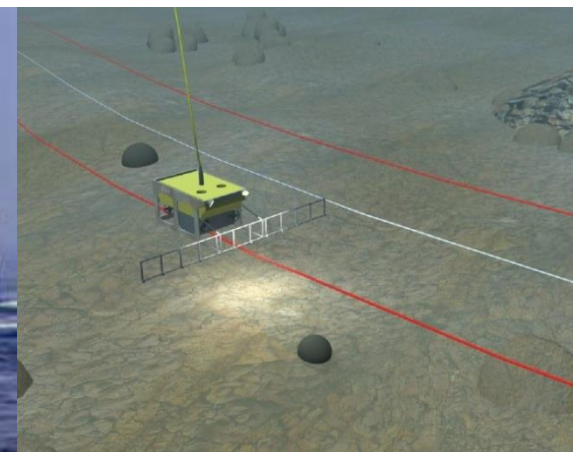

Finally, a formal report of disposal operations shall be provided by the UXO disposal sub contractor.
