3. Description of works:

Maintenance, refurbishment and upgrade of pontoons at various locations - Portpatrick, Girvan, Troon, Campbelltown, Tobermory, Mallaig, Leverburgh, Lochinver, Thurso, Longhope, Stromness, Kirkwall, Wick, Invergordon, Buckie, Peterhead, Aberdeen, Montrose and Eyemouth.

As described in application dated 22 August 2019, and correspondence submitted in support of the application.

4. Nature and indicative quantity of all materials used in construction below Mean High Water Springs:

All materials used in maintenance activities associated with each pontoon as described in the General Method Statement for Category 2 Works document, the application and supporting documentation.

Part 2 - Conditions

1. The licensee must notify the licensing authority of the date of commencement and the date of completion of all operations relating to the licence. Separate notifications are required at the times of commencement and completion.
2. The licensee must ensure that only the materials used in construction listed in Part 1 of the licence are deposited during the execution of the works and that all substances or objects deposited during the execution of the works are inert and do not contain toxic elements which may be harmful to the marine environment, the living resources which it supports or human health.
3. The licensee must ensure that any debris or waste materials, including biofouling, arising during the course of the works are removed from the site of the works for disposal at an approved location above the tidal level of Mean High Water Springs.
4. The licensee must submit a written report regarding the materials used during the works to the licensing authority. The written report must be submitted on completion of the works and on the forms provided by the licensing authority no later than 31 October 2027.
5. The licensee must ensure that HM Coastguard, in this case nmoccontroller@hmcg.gov.uk, The National Maritime Operations Centre is made aware of each individual works operation prior to commencement.
6. The licensee must ensure that a copy of this licence is given to each contractor appointed to carry out part or all of the works in order that they are clear about the extent of the works for which the licence has been given and the conditions that are attached to the licence.
7. The licensee must ensure that appropriate steps are taken to minimise damage to the beach, foreshore and seabed by the works.
8. The licensee must issue local notification to marine users – including fisherman's organisations, neighbouring port authorities and other local stakeholders – to ensure that they are made fully aware of the activity prior to each individual works operation.
9. The licensee must ensure that best method of practice is used to minimise re-suspension of sediment during these works.
10. The licensee must ensure suitable bunding and storage facilities are employed to prevent the release of fuel oils, lubricating fluids associated with the plant and equipment into the marine environment.
11. If it is desired to display any marks or lights not required by this licence then details must be submitted to the Northern Lighthouse Board and their ruling complied with. The display of unauthorised marks or lights is prohibited.
12. The licensee must ensure that no deviation from the schedule specified in the licence is made without the further written consent of the licensing authority.
13. If in the opinion of the licensing authority the assistance of a Government Department, including the broadcast of navigational warnings, is required to deal with any emergency arising from:

- a) The failure to mark and light the works as required by licence.
- b) The maintenance of the works.
- c) The drifting or wreck of the works.

The licensee must be liable for any expenses incurred in securing such assistance.

14. In the event of the licensed operations being discontinued the works must be removed and the site cleared to the satisfaction of the licensing authority.
15. The licensee must remove the works from below the level of Mean High Water Springs, or such alterations made, within one month of notice being given by the licensing authority at any time it is considered necessary or advisable for the safety of navigation, and not replaced without further consent by the licensing authority. The licensee shall be liable for any expense incurred.
16. Any person authorised by the licensing authority must be permitted to inspect the works at any reasonable time.
17. The licensee must ensure that copies of the licence are available for inspection by any authorised Enforcement Officer at:
 - a) the premises of the licensee;
 - a) the premises of any agent acting on behalf of the licensee; and
 - b) the site of the works.
18. In the event of the licensee becoming aware that any of the information on which the issue of the licence was based has changed, the licensing authority must be immediately notified of the details.
19. No piling is permitted under the licence. If piling is required, the licensee must submit a Piling Strategy document to the licensing authority for its written approval no less than two months prior to any planned piling.
20. All works must be carried out in accordance with the Scottish Environment Protection Agency's Guidance for Pollution Prevention (GPPs): <http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/> .
21. The licensee must ensure that the works are maintained at all times in good repair.
22. All temporary fuel bunds, silt traps and other pollution prevention measures must be checked and maintained on a regular basis and when periods of rain are forecast.
23. Works at the Aberdeen Lifeboat Station must not take place between 13 April and 24 May, inclusive.
24. If a new licence is required, the licensee must make an application at least fourteen weeks before the expiry date of this licence. **This licence shall not continue in force after the expiry date of 16 April 2026.**

NOTES

1. You are deemed to have satisfied yourself that there are no barriers, legal or otherwise, to the carrying out of the licensed operations. The issue of the licence does not absolve the licensee from obtaining such authorisations, consents etc which may be required under any other legislation.
2. In the event that the licensee wishes any of the particulars set down in the Schedule to be altered, the licensing authority must be immediately notified of the alterations. It should be noted that changes can invalidate a licence, and that an application for a new licence may be necessary.
3. Under Section 30 of the Marine (Scotland) Act 2010, the licensing authority may vary, suspend or revoke the licence, if it appears to the authority that there has been a breach of any of the provisions of the licence or for any other reason that appears to be relevant to the authority.
4. Under Section 39 of the Marine (Scotland) Act 2010, it is an offence to carry on a licensable marine activity or cause or permit any other person to carry on such an activity without a marine licence or fails to comply with any condition of a marine licence. It is a defence for a person charged with an offence under Section 40 in relation to any activity to prove that the activity was carried out for the purpose of saving life, or for the purposes of securing the safety of a vessel, aircraft or marine structure (*'force majeure'*), and that the person took steps within a reasonable time to provide full details of the incident to the licensing authority. (Under Annex II, Article 7 of the Convention for the Protection of the Marine Environment of the North-East Atlantic, the licensing authority is obliged to immediately report *'force majeure'* incidents to the Convention Commission).
