

Section 6 (d) – (Other) FOR USE ABOVE MHWS

Type of Deposit	Description	Quantity and Dimensions
Steel	Scaffolding - The scaffold is built to provide access to the underside of any respective structure, and these are boarded out, covered in visqueen and correx, then encapsulated, which prevents any waste from entering the atmosphere outside the working area. Upon completing of works, all waste materials within scaffolding is carefully removed and disposed of in accordance with current waste management guidelines and regulations, and then the scaffolding is dismantled and removed from site.	500 m ²
