

BERWICK BANK WIND FARM OFFSHORE ENVIRONMENTAL IMPACT ASSESSMENT

**APPENDIX 11.1, ANNEX I:
DESIGN-BASED ANALYSIS –
POPULATION ESTIMATES FOR
FLYING BIRDS GROUPED BY
SPECIES (BERWICK BANK
DEVELOPMENT ARRAY ONLY)**

Document Status					
Version	Purpose of Document	Authored by	Reviewed by	Approved by	Review Date
Final	SSER Review	HiDef Aerial Surveying Ltd.	HiDef Aerial Surveying Ltd.	HiDef Aerial Surveying Ltd.	July 2022

Compiled by HiDef Aerial Surveying Ltd.
 Confidential until approved by the Client.

Approval for Issue		
Sarah Edwards	[Redacted]	11 November 2022

Prepared by:	HiDef Aerial Surveying Ltd.
Prepared for:	SSE Renewables
Checked by:	Andrew Logie
Accepted by:	Emily Nelson
Approved by:	Sarah Edwards

NOTE

This annex provides both apportioned and unapportioned density and population estimates for flying birds of focal species within the Berwick Bank Development Array only. Estimates provided are deemed to be representative, as flying birds are unaffected by availability bias.

TABLES

Table 1:	Unapportioned density and population estimates of flying common scoters in the Berwick Bank Development Array only, calculated using design-based analysis	1	Table 17:	Unapportioned density and population estimates of flying common terns in the Berwick Bank Development Array only, calculated using design-based analysis	6
Table 2:	Apportioned density and population estimates of flying common scoters in the Berwick Bank Development Array only, calculated using design-based analysis	1	Table 18:	Apportioned density and population estimates of flying common terns in the Berwick Bank Development Array only, calculated using design-based analysis	6
Table 3:	Unapportioned density and population estimates of flying kittiwakes in the Berwick Bank Development Array only, calculated using design-based analysis	1	Table 19:	Unapportioned density and population estimates of flying Arctic terns in the Berwick Bank Development Array only, calculated using design-based analysis	7
Table 4:	Apportioned density and population estimates of flying kittiwakes in the Berwick Bank Development Array only, calculated using design-based analysis	2	Table 20:	Apportioned density and population estimates of flying Arctic terns in the Berwick Bank Development Array only, calculated using design-based analysis	7
Table 5:	Unapportioned density and population estimates of flying black-headed gulls in the Berwick Bank Development Array only, calculated using design-based analysis	2	Table 21:	Unapportioned density and population estimates of flying great skuas in the Berwick Bank Development Array only, calculated using design-based analysis	7
Table 6:	Apportioned density and population estimates of flying black-headed gulls in the Berwick Bank Development Array only, calculated using design-based analysis	2	Table 22:	Apportioned density and population estimates of flying great skuas in the Berwick Bank Development Array only, calculated using design-based analysis	8
Table 7:	Unapportioned density and population estimates of flying little gulls in the Berwick Bank Development Array only, calculated using design-based analysis	3	Table 23:	Unapportioned density and population estimates of flying little auks in the Berwick Bank Development Array only, calculated using design-based analysis	8
Table 8:	Apportioned density and population estimates of flying little gulls in the Berwick Bank Development Array only, calculated using design-based analysis	3	Table 24:	Apportioned density and population estimates of flying little auks in the Berwick Bank Development Array only, calculated using design-based analysis	8
Table 9:	Unapportioned density and population estimates of flying common gulls in the Berwick Bank Development Array only, calculated using design-based analysis	3	Table 25:	Unapportioned density and population estimates of flying guillemots in the Berwick Bank Development Array only, calculated using design-based analysis	9
Table 10:	Apportioned density and population estimates of flying common gulls in the Berwick Bank Development Array only, calculated using design-based analysis	4	Table 26:	Apportioned density and population estimates of flying guillemots in the Berwick Bank Development Array only, calculated using design-based analysis	9
Table 11:	Unapportioned density and population estimates of flying great black-backed gulls in the Berwick Bank Development Array only, calculated using design-based analysis	4	Table 27:	Unapportioned density and population estimates of flying razorbills in the Berwick Bank Development Array only, calculated using design-based analysis	9
Table 12:	Apportioned density and population estimates of flying great black-backed gulls in the Berwick Bank Development Array only, calculated using design-based analysis	4	Table 28:	Apportioned density and population estimates of flying razorbills in the Berwick Bank Development Array only, calculated using design-based analysis	10
Table 13:	Unapportioned density and population estimates of flying herring gulls in the Berwick Bank Development Array only, calculated using design-based analysis	5	Table 29:	Unapportioned density and population estimates of flying puffins in the Berwick Bank Development Array only, calculated using design-based analysis	10
Table 14:	Apportioned density and population estimates of flying herring gulls in the Berwick Bank Development Array only, calculated using design-based analysis	5	Table 30:	Apportioned density and population estimates of flying puffins in the Berwick Bank Development Array only, calculated using design-based analysis	10
Table 15:	Unapportioned density and population estimates of flying lesser black-backed gulls in the Berwick Bank Development Array only, calculated using design-based analysis	5	Table 31:	Unapportioned density and population estimates of flying red-throated divers in the Berwick Bank Development Array only, calculated using design-based analysis	11
Table 16:	Apportioned density and population estimates of flying lesser black-backed gulls in the Berwick Bank Development Array only, calculated using design-based analysis	6	Table 32:	Apportioned density and population estimates of flying red-throated divers in the Berwick Bank Development Array only, calculated using design-based analysis	11
			Table 33:	Unapportioned density and population estimates of flying fulmars in the Berwick Bank Development Array only, calculated using design-based analysis	11
			Table 34:	Apportioned density and population estimates of flying fulmars in the Berwick Bank Development Array only, calculated using design-based analysis	12
			Table 35:	Unapportioned density and population estimates of flying Manx shearwater in the Berwick Bank Development Array only, calculated using design-based analysis	12
			Table 36:	Apportioned density and population estimates of flying Manx shearwater in the Berwick Bank Development Array only, calculated using design-based analysis	12

Table 37:	Unapportioned density and population estimates of flying gannets in the Berwick Bank Development Array only, calculated using design-based analysis	13
Table 38:	Apportioned density and population estimates of flying gannets in the Berwick Bank Development Array only, calculated using design-based analysis	13
Table 39:	Unapportioned density and population estimates of flying shags in the Berwick Bank Development Array only, calculated using design-based analysis	13
Table 40:	Apportioned density and population estimates of flying shags in the Berwick Bank Development Array only, calculated using design-based analysis	14
