## TABLES

Table 1: Subsites included by the Marine Scotland Apportioning Tool in the apportioning of kittiwake. ....	1
Table 2: Subsites included by the Marine Scotland Apportioning Tool in the apportioning of guillemot.....	11
Table 3: Subsites included by the Marine Scotland Apportioning Tool in the apportioning of razorbill. ....	23

- The Marine Scotland Apportioning tool was run using subsite as the aggregation level (i.e. subsite within a Seabird Monitoring Programme site). Each subsite was checked against the Seabird Monitoring Programme and/or NatureScot databases and to confirm the original SPA definition was correct. In some cases, subsites are listed by NatureScot as being part of an SPA, but in other cases the coordinates for the site provided by the MS tool were checked for overlap with the boundary of the SPA. If there was a discrepancy with the MS SPA definition, the subsite was reassigned with the definition in the Final SPA aggregation column. Comments are provided to provide reasoning in all cases where the original and final SPA definitions differ.

**Table 1: Subsites included by the Marine Scotland Apportioning Tool in the apportioning of kittiwake.**
