Subject: RE: Consultation Construction Noise Management Plan ("CNMP") for the EOWDC

I refer to the above CNMP.

The plan has been reviewed by Aberdeen City Environmental Health Service.

It is understood that offshore construction activities are unlikely to have any adverse impacts on the nearest onshore noise sensitive receptors.

The plan details that some onshore export cable installation drilling may be require 24 hours operation for a limited period of time. If such operations are required the contractor is requested to contact the Environmental Health Service 21 days prior to the proposed out of hour work being undertaken to discuss nature of works, mitigation and community liaison.

Subject: RE: REMINDER - Consultation Construction Noise Management Plan ("CNMP") for the EOWDC

Good afternoon,

Please find comments from Aberdeenshire Council on the above CNMP.

*Page 18 (5)
Construction noise thresholds*

The table is taken from the ABC method of BS 5228-1:2009

*The noise levels at nearby properties onshore were calculated . **What were these?
Are these back ground levels or noise levels once work is in progress?
Would we be able to see copies of any noise reports that relate to this document***

*Page 19 states if working hours outside of those listed above are required, mitigation will be discussed with the Local Authority . **What would the mitigation be?***

Please could you provide information regarding the items highlighted in red so that we could make a better informed assessment of the management plan.

Again apologies for the delay, and thank you for allowing us the extension of time.

Kind regards

Ann Ramsay
