

Note: This drawing illustrates a computer generated Zone of Theoretical Visibility (ZTV) for the indicative primary construction compounds.

The areas shown in coloured shading (identified on the key) indicate the maximum theoretical visibility of the indicative primary construction compounds based on a height of 20m (height of concrete batching units), using OS Terrain 5 data.

Vector data for existing buildings (8m height) and the main areas of existing woodland (12m) has been used to exclude these features from the ZTV.

The ZTV includes an adjustment that allows for the Curvature and Light Refraction of the Earth.

- Red Line Boundary
- 2km study area for primary construction compounds
- Indicative primary construction compound
- Zone of Theoretical Visibility for only primary construction compound A (20m height for concrete batching)
- Zone of Theoretical Visibility for only primary construction compound B (20m height for concrete batching)
- Zone of Theoretical Visibility for only primary construction compound C (20m height for concrete batching)
- Zone of Theoretical Visibility for only primary construction compound A and B (20m height for concrete batching)
- Zone of Theoretical Visibility for only primary construction compound B and C (20m height for concrete batching)

Viewpoints

- 1) A950 track to Downiehill
- 2) Minor road south of Forehill House
- 3) Minor road east of Stockbridge
- 4) A950 junction to Longside airfield
- 5) Downieshill Cottage
- 6) Toddlehill near quarry
- 7) Cowsrieve
- 8) Formartine Buchan Way, near Easterton Cottages
- 9) A90 near Meg's Moss
- 10) A950, near Flushing
- 11) Upper Savock
- 12) A90 junction at Hallmoss
- 13) Minor road near Kincairn
- 14) Reform Tower
- 15) Core Path, Craigewan Club
- 16) Core Path, Peterhead Golf Club
- 17) Minor road near Newton
- 18) A90 layby near Cuttie Burn
- 19) A90 near Inverquinzie Cotts
- 20) St Fergus Links
- 21) Minor road near South Scotston
- 22) St Fergus Links near Scotstown Beach
