Dear Ms Agnisola

Telford Offshore Wind Farm and Stevenson Offshore Wind Farm Consent conditions: Condition 33 Herring

Please find enclosed the "Herring Larvae Annual Review" prepared on behalf of Moray Offshore Windfarm (East) Limited (Moray East), the company developing the Telford and Stevenson Offshore Wind Farms.

The attached report provides a desktop review of herring spawning and larvae abundance within the vicinity of the Telford and Stevenson Offshore Wind Farms in line with the agreed "Proposal & Scope of Works: Herring Larval Monitoring" report (MS-LOT letter reference 011/OW/MORLE – 8, dated 10 May 2017).

Moray East request written confirmation that Marine Scotland agrees that the attached report provides the information required under the 'annual desktop review of herring larvae' in line with the agreed herring larval monitoring scope of works under Section 36 consent condition 33 of the Telford and Stevenson Offshore Wind Farms.

I trust the information is sufficient, but please do not hesitate to get in touch should you require any further information or wish to discuss any of the above in detail.

Yours sincerely

Sarah Pirie
Head of Development
