**Potential Screening Opinion under The Marine Works (Environmental Impact Assessment) Regulations 2017  
Hunterston Marine Construction Yard**

We write with reference to to our letter dated 15 February 2019 (Letter Ref No 168612/cgf/022) which responded to the questions raised by Marine Scotland (letter dated 2 November 2018) regarding the proposed construction license application for the above site. We note from your original screening opinion (letter dated 13 June 2017) that if the project as screened is subsequently increased, extended or altered, including any amendments to the mitigation measures, that a further screening request should be sought. If Marine Scotland determines that as a result of this recently submitted information the project now falls within the above definitions for re-screening the proposals, then please take this letter as a formal request to screen the development under the above Regulations. Please advise us of your decision in this regard.

We consider that the information contained within letter Ref No 168612/cgf/022 should provide sufficient information with which to undertake the screening exercise should that be necessary in your view. However, if any aspect of the information is unclear, or you require further detail please contact us.

Should you wish to discuss this further please do not hesitate to contact the undersigned.

Yours sincerely  
**for EnviroCentre Ltd**
