

To whom it may concern,

As landowners of Lower Reiss Farm, we have been in discussion with Wick Harbour Authority regarding their licence application for a beach reclamation project at the southern end of Reiss Beach, located within Sinclair's Bay, north of Wick.

We understand that the material proposed for use in this project would originate from Wick Harbour's Outer Harbour navigation channel, which requires periodic dredging to maintain vessel access at all states of tide.

Subject to a licence being granted to the Authority by the Marine Directorate, we are supportive of the proposed reclamation works and would, in principle, be agreeable to permitting access across our land to the beach in order to assist with the project. Any specific terms relating to access arrangements, maintenance and associated responsibilities would be discussed and agreed separately between the parties prior to commencement of the works.

The beach has been significantly affected by continual storms during the early part of 2026, and we recognise the importance of efforts to restore and protect this section of coastline.

Yours faithfully,

Douglas Webster
