Dear Mr Ford

Moray Offshore Renewables Limited (MORL)

Marine Licence Application: Modified Transmission Infrastructure for the Telford, Stevenson and MacColl Wind Farms

Further to the application submitted on 4 April and the Scoping Opinion received from Marine Scotland Licensing Operations Team (MSLOT) dated 13 June please find enclosed two sets of the Environmental Statement (ES) in relation to the modified Transmission Infrastructure for the Telford, Stevenson and MacColl Wind Farms (which comes in 5 volumes including the Non Technical Summary). The ES enclosed references to the MORL ES, 2012 which accompanied the Section 36 and Marine Licence applications for the Telford, Stevenson and MacColl wind farms and associated Transmission Infrastructure (as originally proposed). As discussed additional copies of the MORL ES have not been provided to you. It will be available at the deposit locations set out below and all stakeholders will receive a DVD copy.

I would confirm that since the Marine Licence application was submitted MORL has refined both the modified offshore export cable route corridor and the parameters within the Rochdale Envelope. The assessments in the ES have been based on these modified parameters. The co-ordinates for the modified offshore export cable route corridor as assessed in the ES are annexed to this letter. For details of the amended parameters please refer to Chapter 2.2 (Project Description) of the ES.

Annex 1 to Chapter 1.3 (Environmental Impact Assessment) of this ES sets out the MORL response to the MSLOT Scoping Opinion referred to above.

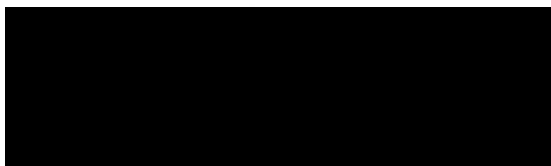

As agreed the ES (together with the MORL ES, 2012 and Ornithology Additional Information 2013) will be placed on deposit in the undernoted locations.
