Re: Marine Licence Variation Request for Marine Licence MS-00010494

I am writing to request a variation to the duration of licence MS-00010494 (Kyle Rhea Overhead Line Crossing Works) to cover the period 1st May 2027 to 31st August 2027. The existing licence period held (1st July to 30th September 2026) no longer covers the anticipated works programme. The duration of the works still constitutes 20 days of work as captured in the application documentation. The change is solely to the timing of the works and introduces no change in duration, and as such is not a material change.

It is of note that the new period does not represent a seasonal change, and as such the works still retain daylight vessel transit hours outside of working/waterway closure hours.

In order to enable the delivery of the works to schedule, please could this variation be determined by 31st January 2026.

Yours sincerely,

Molly Outhwaite
Assistant Marine Consent Manager
For and on behalf of Scottish Hydro Electric Transmission
