

Marine Licence Application for Pontoons

Version 1.0

Marine (Scotland) Act 2010

It is the responsibility of the applicant to obtain any other consents or authorisations that may be required.

Under Section 54 of the Marine (Scotland) Act 2010, all information contained within and provided in support of this application will be placed on a Public Register. There are no national security grounds for application information not going on the Register under the 2010 Act.

Public Register

Do you consider that any of the information contained within or provided in support of this application should not be disclosed:

- (a) for reasons of national security; YES NO
- (b) for reasons of confidentiality of commercial or industrial information where such confidentiality is provided by law to protect a legitimate commercial interest? YES NO

If **YES**, to either (a) or (b), please provide full justification as to why all or part of the information you have provided should be withheld.

WARNING

It is an offence under the Act under which this application is made to fail to disclose information or to provide false or misleading information.

Target duration for determination is 14 weeks. Please note that missing or erroneous information in your application and complications resulting from consultation may result in the application being refused or delayed.

Marine licence applications will not be accepted unless accompanied by a cheque for the correct application fee, or if an invoice is requested, until that invoice is settled. Target timelines for determining applications do not begin until the application fee is paid.

6. Scotland's National Marine Plan

Have you considered the application with reference to Scotland's National Marine Plan?

YES NO

If **YES**, provide details of considerations made with reference to the policies, including but not limited to General Policy 7 (GEN 7), that have been considered:

Summer Isles Enterprises Ltd recognise construction within Scotland's National Marine Plan can significantly impact both the environment and the local economy. According to General Policy 7 of the National Marine Plan, all developments and activities must be managed to minimize their adverse effects on the health of the marine environment, including biodiversity, natural processes, and ecosystem services (Scottish Government, 2015). Subsequently, our plan aims to balance a sustainable development with the protection of marine ecosystems, ensuring that activities like the installation of this concrete pontoon are carried out responsibly by us and we manage our suppliers and contractors diligently. We know from other studies that construction projects, similar in scale can lead to habitat destruction, water pollution, and disruption of marine life. However, we have worked hard internally to fully incorporate these matters and to carefully plan and mitigate all aspects as much as possible. Summer Isles Enterprises Ltd along with our preferred suppliers are always pushing the boundaries of our own construction practices to ensure we are as sustainable as we can be. In the past we have used eco-friendly materials and minimized noise pollution. The National Marine Plan has helped us provide this framework and to create a scope of works which we feel for a development of this size to be satisfactory. In conclusion we feel there are no negative environmental impacts to be concerned about during this development.

If **NO**, please provide an explanation of why you haven't considered the National Marine Plan?

7. Pre-Application Consultation

Is the application subject to pre-application consultation, under The Marine Licensing (Pre-application Consultation) (Scotland) Regulations 2013?
