## **Marine Licence Application for Sediment Sampling**

Version 1.0

Marine (Scotland) Act 2010

#### **Acronyms**

Please note the following acronyms referred to in this application form:

MHWS Mean High Water Springs
MPA Marine Protected Area

MS-LOT Marine Scotland – Licensing Operations Team

SAC Special Area of Conservation
SNH Scottish Natural Heritage
SPA Special Protection Area

SSSI Site of Special Scientific Interest WGS84 World Geodetic System 1984

#### **Explanatory Notes**

The following numbered paragraphs correspond to the questions on the application form and are intended to assist in completing the form. These explanatory notes are specific to this application and so you are advised to read these in conjunction with the Marine Scotland Guidance for Marine Licence Applicants document.

#### 1. Applicant Details

The person making the application who will be named as the licensee.

#### 2. Agent Details

Any person acting under contract (or other agreement) on behalf of any party listed as the applicant and having responsibility for the control, management or physical deposit or removal of any substance(s) or object(s).

#### 3. Payment

Indicate payment method. Cheques must be made payable to: The Scottish Government.

Marine licence applications will not be accepted unless accompanied by a cheque for the correct application fee, or if an invoice is requested, until that invoice is settled. Target timelines for determining applications do not begin until the application fee is paid.

#### 4. Application Type

Indicate if the application is for a new sediment sampling site or an existing sediment sampling site. Provide the existing or previous consent/licence number and expiry date if applicable.

#### 5. Project Details

- (a) Give a brief description of the project e.g. sediment sampling using vibrocore.
- (b) Provide the proposed start date of the project. The start date will not be backdated, since to commence a project for which a licence has not been obtained will constitute an offence, which may result in appropriate legal action. A licence is normally valid for the duration of the project but not exceeding 6 years. If a project will not be completed before a marine licence lapses, it will be necessary for licence holders to re-apply for a further licence to continue any ongoing work at least 14 weeks prior to the expiry date of the licence. Target duration for determination of a marine licence application is 14 weeks.
- (c) Provide the proposed completion date of the project.
- (d) Provide the cost of the works seawards of the tidal limit of MHWS. This estimate should only cover work taking place below the tidal level of MHWS and must take into consideration the cost of materials, labour fees etc.
- (e) Describe the location of the proposed works. Include a list of the latitude and longitude co-ordinates (WGS84) of each sampling location. WGS84 is the World Geodetic System 1984 and the reference coordinate system used for marine licence applications. Co-ordinates taken from GPS equipment should be set to WGS84. Coordinates taken from recent admiralty charts will be on a WGS84 compatible

datum. Ordnance survey maps do not use WGS84.

**Example:** For positions read from charts the format should be as in the example: 55°55.555'N 002°22.222'W (WGS84). The decimal point specifies that decimals of minutes are used and the datum is stated explicitly. If seconds are used then the format should be as in the example: 55°55'44"N 2°22'11"W (WGS84).

# It is important that the correct positions, in the correct format, are included with this application, as any errors will result in the application being refused or delayed.

To supplement your application, please provide a suitably scaled extract of an Ordnance Survey Map (1:2,500 scale but not more than 1:10,000) or Admiralty Chart which must be marked to indicate:

- o the full extent of the works in relation to the surrounding area;
- latitude and longitude co-ordinates defining the location of the works;
- the level of MHWS;
- o any adjacent SAC, SPA, SSSI, MPA, Ramsar or similar conservation area boundary.

Drawings and plans will be consulted upon. If they are subject to copyright, it is the responsibility of the applicant to obtain necessary approvals to reproduce the documents and to submit suitably annotated copies with the application.

- (f) Indicate if the project is located within the jurisdiction of a statutory harbour authority and provide details of the statutory harbour authority where relevant.
- (g) Provide a full method statement, including schedule of work and whether jack-up barge or vessel to be used.
- (h) Provide assessment of the potential impacts the works may have, including interference with other uses of the sea. Please include details of areas of concern e.g designated conservation areas, such as a SAC, SPA, SSSI, MPA or Ramsar site and shellfish harvesting areas. Further guidance on designated conservation areas can be obtained from SNH at this website: <a href="http://gateway.snh.gov.uk/sitelink/index.jsp">http://gateway.snh.gov.uk/sitelink/index.jsp</a> and guidance on shellfish harvesting areas can be obtained from <a href="http://www.foodstandards.gov.scot/">http://www.foodstandards.gov.scot/</a> with regards to the Shellfish Waters Directive (2006/113/EC) which has parameters set to protect the water quality in which edible shellfish are grown.

Applicants should also be aware of the need to pay due regard to coastal and marine archaeological matters and attention is drawn to Historic Scotland's Operational Policy Paper HP6, "Conserving the Underwater Heritage".

Where there are potential impacts from the works, please provide details of proposed mitigation in response to potential impacts.

#### 6. Sampling Details

(a) Indicate all types of sampling proposed, including the number of sampling locations, sampling depth and volume of sediment for removal in cubic metres at each sampling location.

Where the project involves a number of elements, please complete all appropriate sections.

- (b) Provide the vessel name, vessel type and name and address of all vessel operators to be used for sediment sampling operations. If vessel details are not available at the time of application, please indicate this on the form as these details will be required prior to licence issue. Continue on a separate sheet if necessary.
- (c) Provide details of the vessel role (e.g guard or fisheries liaison), indicate if the vessel(s) will be stationary during any sampling work and provide details of the length of time that the vessel(s) will be stationary.

#### 7. Noise Monitoring

Under the Marine Strategy Regulations (2010), there is now a requirement to monitor loud, low to mid frequency (10Hz to 10kHz) impulsive noise. Activities where this type of noise is produced include seismic airguns, other geophysical surveys (<10kHz), pile driving, explosives and certain acoustic deterrent devices. Where noisy activity is being undertaken, you must complete an initial registration form for the noise registry which allows you to provide details on the proposed work. Completion of a 'close-out' form, which allows licensees to provide details of the actual dates and locations where the activities occurred, is also required within 12 weeks of the completion of the 'noisy' activity or, in the case of prolonged activities such as piling for harbour construction or wind farms, at quarterly intervals or after each phase of foundation installation.

These forms can be downloaded from:

http://www.scotland.gov.uk/Topics/marine/science/MSInteractive/Themes/noise-reduction

#### Marine licence applications will not be accepted until this form has been completed and submitted.

#### 8. Scotland's National Marine Plan

Scotland's National Marine Plan has been prepared in accordance with the EU Directive 2014/89/EU, which came into force in July 2014. The Directive introduces a framework for maritime spatial planning and aims to promote the sustainable development of marine areas and the sustainable use of marine resources. It also sets out a number of minimum requirements all of which have been addressed in this plan. In doing so, and in accordance with article 5(3) of the Directive, Marine Scotland have considered a wide range of sectoral uses and activities and have determined how these different objectives are reflected and weighted in the marine plan. Land-sea interactions have also been taken into account as part of the marine planning process. Any applicant for a marine licence should consider their proposals with reference to Scotland's National Marine Plan. Α copy of Scotland's National Marine Plan can he found http://www.gov.scot/Publications/2015/03/6517/0

Indicate whether you have considered the project with reference to Scotland's National Marine Plan and provide details of considerations made including reference to the policies that have been considered. If you have not considered the project with reference to Scotland's National Marine Plan please provide an explanation.

#### 9. Consultation

Provide details of all bodies consulted and give details of any consents issued including date of issue.

#### 10. Associated Works

Indicate whether the application is associated with any other marine projects (e.g. land reclamation, marine/harbour construction works, dredging and sea disposal etc). If this is the case, provide reference/licence number for the related marine projects.

## **Marine Licence Application for Sediment Sampling**

Version 1.0

### Marine (Scotland) Act 2010

It is the responsibility of the applicant to obtain any other consents or authorisations that may be required.

Under Section 54 of the Marine (Scotland) Act 2010, all information contained within and provided in support of this application will be placed on a Public Register. There are no national security grounds for application information not going on the Register under the 2010 Act.

Pub	lic Register	
	you consider that any of the information contained wald not be disclosed:	ithin or provided in support of this application
(a)	for reasons of national security;	YES NO
(b) prov	for reasons of confidentiality of commercial or industided by law to protect a legitimate commercial interest	
	<b>ES</b> , to either (a) or (b), please provide full justification a ided should be withheld.	s to why all or part of the information you have

#### WARNING

It is an offence under the Act under which this application is made to fail to disclose information or to provide false or misleading information.

Target duration for determination is 14 weeks. Please note that missing or erroneous information in your application and complications resulting from consultation may result in the application being refused or delayed.

Marine licence applications will not be accepted unless accompanied by a cheque for the correct application fee, or if an invoice is requested, until that invoice is settled. Target timelines for determining applications do not begin until the application fee is paid.

#### **Declaration**

I declare to the best of my knowledge and belief that the information given in this form and related papers is true.

Signature			Date	09/10/18
Name in BL0	OCK LETTERS 1			

#### **Application Check List**

Please check that you provide all relevant information in support of your application, including but not limited to the following:

•	Completed and signed application form	~
•	Maps/Charts	<b>V</b>
•	Co-ordinates of the boundary points of the area of harbour jurisdiction (if you are a statutory harbour authority)	
•	Method Statement	
•	Additional information e.g. photographs, consultation correspondence (if applicable)	<b>V</b>
•	Noise Registry – Initial Registration Form (if applicable)	
• .	Payment (if paying by cheque)	

	Title: Surname:	
	Trading Title (if appropriate): Highlands and Islands Airport Ltd	
	Address: Inverness Airport Dalcross, Inverness, IV2 7JB	
	Name of contact (if different):	
	Telephone No. (inc. dialing code):	
	Email:	
	Statutory Harbour Authority? YES ☐ NO ■	
	If <b>YES</b> , please provide a list of the latitude and longitude co-ordinates (WGS84) of the of the area of harbour jurisdiction using Appendix 01 Additional Co-ordinates form if no	
2.	2. Agent Details (if any)	
	Title: Surname:	
	Trading Title (if appropriate): Arup	
	Address: 1 West Regent Street, Glasgow, G2 1RW	
	Name of contact (if different):

5	7	٥	3	2		8	9	8	' N			4	0	4	2	1	6	,

5.

(f) Is the project located within the jurisdiction of a statutory harbour authority?  YES □ NO ■  If YES, please specify statutory harbour authority:
(g) Method statement including schedule of work and whether jack-up barge or vessel to be used (continue on separate sheet if necessary):
At this stage it is envisaged that a survey vessel will be utilised to undertake the seabed Vibrocoring and CPTu testing activities. A machine excavator will be utilised to undertake the trial trench locations that are located within the intertidal zone as shown on Figure 01. However, the finalised methodology will be provided by the appointed contractor.
The scope of works proposed is as follows:  •8 No. Seabed CPTU's to a depth of 8m below seabed level;  •8 No. Vibrocores to a depth of 5mbgl;  •4 No. Machine excavated trial trenches to 3.5mbgl;  •Collection of geotechnical and geoenvironmental samples;  •Program of geotechnical and geoenvironmental laboratory testing of sediment and soils.  •Marine Scotland Sediment Testing (in accordance with doc Marine Scotland – Pre-disposal Sampling Guidance Version 2 – November 2017).
(h) Potential impacts the works may have (including details of areas of concern e.g designated conservation and shellfish harvesting areas) and proposed mitigation in response to potential impacts (continue on separate sheet if necessary):
The site is located within a Special Area of Conservation. The Moray Firth SAC has been designated for the species 'Bottlenose dolphin' and for 'Sandbanks which are slightly covered by sea water all the time'.
The GI works are temporary and located on-shore and within the shallow depths of the coastal waters. Liaison with the SNH will also be undertaken. Also, upon appointment of the contractor, they will provide a method statement detailing the appropriate mitigation measures in relation to their works.

#### 6. Sampling Details

(a) Please indicate sampling details:

Type of Sampling	Number of Sampling Locations	Sampling Depth (metres)	Volume of Sediment for Removal (from each sampling location in cubic metres)
Mechanical bucket or shovel			
Grabbing – surface sediments			
Boreholes	8 (vibrocores)	5	0.036m3 (0.29m3 total)
Trial Pits	4	3.5	1.75m3 (7m3 total)
Other (please specify)			

(b) Details of any vessel(s) undertaking sediment sampling (please note that a marine licence cannot be issued until the vessel details have been confirmed. Continue on a separate sheet if necessary):

Vessel	Vessel Name	Type of Vessel	Name and Address of Operator
1	To be confirmed once contractor is appointed	To be confirmed once contractor is appointed	To be confirmed once contractor is appointed
2			
3			
4			
5			

(c) Further details of any vessel(s) undertaking sediment sampling (please note that a marine licence cannot be issued until the vessel details have been confirmed. Continue on a separate sheet if necessary):

Vessel	Vessel Role (e.g guard or fisheries liaison)	Vessel to be Stationary (include length of time to be stationary)
1	To be confirmed once contractor is appointed	To be confirmed once contractor is appointed

#### 9. Consultation

List all bodies you have consulted and provide copies of correspondence:

The following bodies/ stakeholders have been consulted as part of the overall scheme Controlled Activities Regulations (CAR) draft application report.

- SNH
- Ness and Beauly Fisheries Trust
- Ardersier Community Council
- SEPA

The document section summarising the consultation responses is included with this application.

10. Associated Wor	JIKS
