## **Marine Licence Application for Construction Projects**

Version 1.0

### **Marine (Scotland) Act 2010**

## Acronyms

Please note the following acronyms referred to in this application form:

<b>BPEO</b>	Best Practicable Environmental Option
<b>EIA</b>	Environmental Impact Assessment
<b>ES</b>	Environmental Statement
<b>MHWS</b>	Mean High Water Springs
<b>MMO</b>	Marine Mammal Observer
<b>MPA</b>	Marine Protected Area
<b>MS-LOT</b>	Marine Scotland – Licensing Operations Team
<b>PAM</b>	Passive Acoustic Monitoring
<b>SAC</b>	Special Area of Conservation
<b>SNH</b>	Scottish Natural Heritage
<b>SPA</b>	Special Protection Area
<b>SSSI</b>	Site of Special Scientific Interest
<b>WGS84</b>	World Geodetic System 1984

## Explanatory Notes

The following numbered paragraphs correspond to the questions on the application form and are intended to assist in completing the form. These explanatory notes are specific to this application and so you are advised to read these in conjunction with the Marine Scotland Guidance for Marine Licence Applicants document.

### **1. Applicant Details**

The person making the application who will be named as the licensee.

### **2. Agent Details**

Any person acting under contract (or other agreement) on behalf of any party listed as the applicant and having responsibility for the control, management or physical deposit or removal of any substance(s) or object(s).

### **3. Payment**

Indicate payment method. Cheques must be made payable to: The Scottish Government.

**Marine licence applications will not be accepted unless accompanied by a cheque for the correct application fee, or if an invoice is requested, until that invoice is settled. Target timelines for determining applications do not begin until the application fee is paid.**

### **4. Application Type**

Indicate if the application is for a new construction site or an existing construction site. Provide the existing or previous consent/licence number and expiry date if applicable.

### **5. Project Details**

- (a) Give a brief description of the project (e.g. construction of a new sea outfall).
- (b) Provide the total area of proposed works in square metres.
- (c) Provide the proposed start date of the project. The start date will not be backdated, since to commence a project for which a licence has not been obtained will constitute an offence, which may result in appropriate legal action. A licence is normally valid for the duration of the project but not exceeding 3 years. If a project will not be completed before a marine licence lapses, it will be necessary for licence holders to re-apply for a further licence to continue any ongoing work at least 14 weeks prior to the expiry date of the licence. **Target duration for determination of a marine licence application is 14 weeks.**
- (d) Provide the proposed completion date of the project.
- (e) Provide the cost of the works seawards of the tidal limit of MHWS. This estimate should only cover

work taking place below the tidal level of MHWS and must take into consideration the cost of materials, labour fees etc.

- (f) Describe the location of the proposed works. Include a list of the latitude and longitude co-ordinates (WGS84) of the boundary points of the proposed project. WGS84 is the World Geodetic System 1984 and the reference co-ordinate system used for marine licence applications. Co-ordinates taken from GPS equipment should be set to WGS84. Coordinates taken from recent admiralty charts will be on a WGS84 compatible datum. Ordnance survey maps do not use WGS84. In a few cases, (e.g. laying of long pipelines) it may only be practicable to supply co-ordinates for the start and end points.

**Example:** For positions read from charts the format should be as in the example: 55°55.555'N 002°22.222'W (WGS84). The decimal point specifies that decimals of minutes are used and the datum is stated explicitly. If seconds are used then the format should be as in the example: 55°55'44"N 2°22'11"W (WGS84).

**It is important that the correct positions, in the correct format, are included with this application, as any errors will result in the application being refused or delayed.**

To supplement your application, please provide photographs of the project location and submit these with your application. Please also provide a suitably scaled extract of an Ordnance Survey Map (1:2,500 scale but not more than 1:10,000) or Admiralty Chart which must be marked to indicate:

- the full extent of the works in relation to the surrounding area;
- latitude and longitude co-ordinates defining the location of the works;
- the level of MHWS;
- any adjacent SAC, SPA, SSSI, MPA, Ramsar or similar conservation area boundary.

Drawings and plans will be consulted upon. If they are subject to copyright, **it is the responsibility of the applicant to obtain necessary approvals to reproduce the documents and to submit suitably annotated copies with the application.**

**Sewer outfalls, discharge pipes for industrial waste etc.** The size and description of the pipe must be shown on the longitudinal sections and also details of its supports, foundations, methods of jointing and details of any tidal flaps.

**Bridges over tidal waters:** An elevation with longitudinal and cross-sections of the bridge to a suitable scale must show the dimensions of the spans and width of piers, etc. above and below MHWS and the maximum and minimum heights of the undersides of the superstructures above MHWS. The headroom above MHWS and the width of span of the nearest bridges, if any, above and below the site must be stated.

**Tunnels under tidal waters:** The longitudinal section of the tunnel must show the distances between the bed of the river or estuary and the top of the tunnels. Cross-sections must show the internal and external dimensions of the tunnel and particulars of construction. When a proposed future dredging level is known this must also be shown on all sections.

**Overhead cables:** Catenary must be supplied in addition to the site plan showing the minimum clearance of the cable at MHWS and the electrical clearance allowed.

- (g) Indicate if the project is located within the jurisdiction of a statutory harbour authority and provide details of the statutory harbour authority where relevant.
- (h) Provide a full method statement, including schedule of works and the ultimate fate of the structure.
- (i) Provide assessment of the potential impacts the works may have, including interference with other uses of the sea. Please include details of areas of concern e.g designated conservation areas, such as a SAC, SPA, SSSI, MPA or Ramsar site and shellfish harvesting areas. Further guidance on designated conservation areas can be obtained from SNH at this website:

<http://gateway.snh.gov.uk/sitelink/index.jsp> and guidance on shellfish harvesting areas can be obtained from <http://www.foodstandards.gov.scot/> with regards to the Shellfish Waters Directive (2006/113/EC) which has parameters set to protect the water quality in which edible shellfish are grown.

Applicants should also be aware of the need to pay due regard to coastal and marine archaeological matters and attention is drawn to Historic Scotland's Operational Policy Paper HP6, "Conserving the Underwater Heritage".

Any application for beach replenishment works must be cross checked as to whether the proposed site is a designated bathing water site. If so, all physical works should ideally be done outwith the Bathing Water Season (1<sup>st</sup> June to 15<sup>th</sup> September). Further guidance on the Bathing Waters Directive (2006/7/EC) can be obtained from <http://apps.sepa.org.uk/bathingwaters/>.

Where there are potential impacts from the works, please provide details of proposed mitigation, such as use of MMOs or PAM, in response to potential impacts.

## 6. Deposits and/or Removals

- (a) Complete the table to indicate all permanent substances or objects to be deposited and/or removed from below MHWS. If you propose using types of substances or objects for which a specific box is not provided in the table, please describe the nature of such substances or objects in the box marked "other".
- (b) Please indicate the method of delivery of any substance(s) or object(s) to be placed below MHWS.
- (c) Where the proposed work involves salt marsh feeding, beach replenishment or land reclamation the description of the substances or objects must include details of its chemical quality. Where the substances or objects have not been chemically analysed, MS-LOT may request representative samples for analysis or require the applicant to arrange for analyses to be undertaken before the marine licence application can be determined.
- (d) If temporary deposits are required, please provide details as with the permanent deposits above. The temporary deposit location details (Latitude and Longitude WGS84) must be added to the form, and the period of time the site will be used must be provided. If granting a licence, MS-LOT will include on the document details of any area that has been approved as a temporary deposit site.

## 7. Disposal of Dredged Substance(s) or Object(s) at Sea

- (a) If you are proposing to dispose of any excess substance(s) or object(s) arising from the project at sea, a separate marine licence will be required (see Dredging and Sea Disposal application form). The granting of a marine licence for construction projects does not imply that a marine licence for sea disposal will also be granted as different assessment criteria are used to determine each type of application. If a separate application is being submitted for dredging and sea disposal then this must be accompanied with a BPEO report.
- (b) Provide the quantity of dredged substance(s) or object(s) for sea disposal in wet tonnes.

## 8. Noise Monitoring

Under the Marine Strategy Regulations (2010), there is now a requirement to monitor loud, low to mid frequency (10Hz to 10kHz) impulsive noise. Activities where this type of noise is produced include seismic airguns, other geophysical surveys (<10kHz), pile driving, explosives and certain acoustic deterrent devices. Where noisy activity is being undertaken, you must complete an initial registration form for the noise registry which allows you to provide details on the proposed work. Completion of a 'close-out' form, which allows licensees to provide details of the actual dates and locations where the activities occurred, is also required within 12 weeks of the completion of the 'noisy' activity or, in the case of prolonged activities such as piling for harbour construction or wind farms, at quarterly intervals or after each phase of foundation installation.

These forms can be downloaded from:

<http://www.scotland.gov.uk/Topics/marine/science/MSInteractive/Themes/noise-reduction>

**Marine licence applications will not be accepted until this form has been completed and submitted.**

## 9. Statutory Consenting Powers

Please describe in the answer to this question what (if any) statutory responsibilities you (or your client) have to consent any aspect of the project.

## 10. Scotland's National Marine Plan

Scotland's National Marine Plan has been prepared in accordance with the EU Directive 2014/89/EU, which came into force in July 2014. The Directive introduces a framework for maritime spatial planning and aims to promote the sustainable development of marine areas and the sustainable use of marine resources. It also sets out a number of minimum requirements all of which have been addressed in this plan. In doing so, and in accordance with article 5(3) of the Directive, Marine Scotland have considered a wide range of sectoral uses and activities and have determined how these different objectives are reflected and weighted in the marine plan. Land-sea interactions have also been taken into account as part of the marine planning process. Any applicant for a marine licence should consider their proposals with reference to Scotland's National Marine Plan. A copy of Scotland's National Marine Plan can be found at: <http://www.gov.scot/Publications/2015/03/6517/0>

Indicate whether you have considered the project with reference to Scotland's National Marine Plan and provide details of considerations made with reference to the policies, including but not limited to General Policies 7 and 13 (GEN 7 and GEN 13), that have been considered. If you have not considered the project with reference to Scotland's National Marine Plan please provide an explanation.

## 11. Pre-Application Consultation

Certain activities will be subject to public pre-application consultation. Activities affected will be large projects with the potential for significant impacts on the environment, local communities and other legitimate uses of the sea. The new requirement will allow those local communities, environmental groups and other interested parties to comment on a proposed development in its early stages – before an application for a marine licence is submitted. Further information can be obtained from: <http://www.scotland.gov.uk/Resource/0043/00439649.pdf>

If applicable, please provide your pre-application consultation report with your application.

## 12. Consultation (other than carried out under pre-application consultation)

Provide details of all bodies consulted and give details of any consents issued including date of issue.

## 13. Environmental Assessment

- (a) Under the Marine Works Environmental Impact Assessment (EIA) Regulations 2007, there may be a requirement for certain projects to undergo an EIA and produce an ES. If EIA is required, MS-LOT will not determine a marine licence application until the EIA consent decision in respect of the marine licence application has been reached. Please confirm if the project falls under Annex I or II of Directive 85/337/EEC: <http://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32011L0092&from=EN> in relation to the Marine Works (EIA) Regulations 2007.

**Marine licence applications for proposals which fall under the regulations will not be accepted unless a screening opinion has been issued in relation to this.**

- (b) Please indicate if an EIA has been undertaken and whether it was for the marine licence application to which this application relates or for any other EIA regulator (e.g local authority). Please attach any previous ES to the application.

**MS-LOT will not determine a marine licence application until the EIA consent decision in respect of any regulated activity associated with the marine licence application has been reached.**

## 14. Associated Works

Indicate whether the application is associated with any other marine projects (e.g. land reclamation, marine/harbour construction works, dredging and sea disposal etc). If this is the case, provide reference/licence number for the related marine projects.

# Marine Licence Application for Construction Projects

Version 1.0

## Marine (Scotland) Act 2010

It is the responsibility of the applicant to obtain any other consents or authorisations that may be required.

Under Section 54 of the Marine (Scotland) Act 2010, all information contained within and provided in support of this application will be placed on a Public Register. There are no national security grounds for application information not going on the Register under the 2010 Act.

### Public Register

Do you consider that any of the information contained within or provided in support of this application should not be disclosed:

- (a) for reasons of national security; YES  NO
- (b) for reasons of confidentiality of commercial or industrial information where such confidentiality is provided by law to protect a legitimate commercial interest? YES  NO

If **YES**, to either (a) or (b), please provide full justification as to why all or part of the information you have provided should be withheld.

## WARNING

It is an offence under the Act under which this application is made to fail to disclose information or to provide false or misleading information.

Target duration for determination is 14 weeks. Please note that missing or erroneous information in your application and complications resulting from consultation may result in the application being refused or delayed.

Marine licence applications will not be accepted unless accompanied by a cheque for the correct application fee, or if an invoice is requested, until that invoice is settled. Target timelines for determining applications do not begin until the application fee is paid.

### Declaration

I declare to the best of my knowledge and belief that the information given in this form and related papers is true.

Signature [Redacted]

Date

29/07/24

Name in BLOCK LETTERS

KATRINA GORMAN

### Application Check List

Please check that you provide all relevant information in support of your application, including but not limited to the following:

- Completed and signed application form
- Project Drawings
- Maps/Charts
- Co-ordinates of the boundary points of the area of harbour jurisdiction (if you are a statutory harbour authority)
- Method Statement
- Photographs of the location of the project
- Additional information e.g. consultation correspondence (if applicable)
- Noise Registry – Initial Registration Form (if applicable)
- Pre-application Report (if applicable)
- Environmental Statement (if applicable)
- Payment (if paying by cheque)

**1. Applicant Details**

Title: **Miss**                      Initials: **KG**                      Surname: **Gorman**

Trading Title (if appropriate):

Address: **Falkirk Stadium, 4 Stadium Way, Falkirk FK2 9EE**

Name of contact (if different):

Telephone No. (inc. dialing code): [Redacted]

Email: **katrina.gorman@falkirk.gov.uk**

Statutory Harbour Authority?              YES  NO

If **YES**, please provide a list of the latitude and longitude co-ordinates (WGS84) of the boundary points of the area of harbour jurisdiction using Appendix 01 Additional Co-ordinates form if necessary.

**2. Agent Details (if any)**

Title:                                      Initials:                                      Surname:

Trading Title (if appropriate):

Address:

Name of contact (if different):

Telephone No. (inc. dialing code):

Email:

**3. Payment**

Enclosed Cheque                       Invoice

Contact and address to send invoice to:

Applicant                       Agent                       Other

If **OTHER**, please provide contact details:

Title:                                      Initials:                                      Surname:

Address:

Email:

#### 4. Application Type

Is this application for a new construction site or an existing construction site:

New Site  Existing Site

If an **EXISTING SITE**, please provide the consent/licence number and expiry date:

Consent/Licence Number	Expiry Date

#### 5. Project Details

(a) Brief description of the project (e.g. construction of a new sea outfall):

To replace 2No. flap valves within banking of River Carron (location map attached – Co-ordinates :- 291227 , 682438).  
To improve maintenance access by creating a concrete platform supported by sheet piling (drawings attached).  
Temporary cofferdams to be installed to prevent ingress of tidal water, with over pumping in place to remove outflowing water.

(b) Total area of the proposed works (in square metres):

Approximately 50 m<sup>2</sup>

(c) Proposed start date (**Target duration for determination of a marine licence application is 14 weeks**):

01/10/24

(d) Proposed completion date:

30/10/24

(e) Cost of the works seawards of the tidal limit of MHWS:

£[Redacted]

(f) Location:

Access to the valves are gained by walking over the flood defence bunds located at the junction between Newton Road and the single track access road (gated). Small area to leave vehicles at this junction and keys can be obtained to open gate if required. To reach the flap valves, operatives must climb down to the silt beds of the outlet where a man-made channel can be found leading from the flap valves to the main body of the River Carron. Co-ordinates: 291222 , 682458

Latitude and Longitude co-ordinates (WGS84) defining the extent of the project (continue on Appendix 01 Additional Co-ordinates form if necessary):

Latitude									Longitude													
5	6	°	0	1	.	3	4	7	'	N	0	0	3	°	4	4	.	8	1	7	'	W
5	6	°	0	1	.	3	5	0	'	N	0	0	3	°	4	4	.	7	9	3	'	W
5	6	°	0	1	.	3	3	7	'	N	0	0	3	°	4	4	.	8	1	0	'	W
5	6	°	0	1	.	3	3	9	'	N	0	0	3	°	4	4	.	7	8	5	'	W
		°			.				'	N				°			.				'	W
		°			.				'	N				°			.				'	W
		°			.				'	N				°			.				'	W
		°			.				'	N				°			.				'	W
		°			.				'	N				°			.				'	W
		°			.				'	N				°			.				'	W

(g) Is the project located within the jurisdiction of a statutory harbour authority?

YES  NO

If **YES**, please specify statutory harbour authority:

Forth Ports

(h) Method statement including schedule of work (continue on separate sheet if necessary):

**Preparation Works:**

- All operatives to receive a site induction.
- Pre-Task Briefing issued from Covanburn site foreman to works area ganger/supervisor, including main hazards and location specific issues/hazards.
- Prior to breaking ground, an up-to-date desktop search will be carried out. This will include service/utility plans will be obtained and reviewed to ensure all known services are highlighted.
- Up to date service drawing will be included in the workpack and these will be in colour & at a suitable legible scale.
- CAT and Gennie scan will be carried out on all 3 modes.
- Any services identified shall be marked up showing their location and route.
- An excavation permit will be issued as per permit to work procedures.
- COSHH forms will be carried out regarding hazardous products.
- HAVS forms will be completed on operatives using power tools.
- DFT's of paint to be checked regularly.
- Operatives to take care as working in a live environment with the public around them.

**Work Method:**

- Operatives will set up the site using herace fencing as agreed by client.
  - Site welfare to be positioned as per agreed area with client.
  - Traffic and pedestrian management to be set up as agreed by the client.
  - Temporary water course management to be placed in cove to protect work area.
  - Area of pipe to be excavated and site arisings to be set aside for redistribution further in the project.
  - Pipe to be cut back to allow for the installation on new concrete base.
  - New concrete platform to be installed in formation and finished to the correct specification.
  - New pipe section to be installed using band seal couplings and extending out min 300mm past the headwall.
  - Pipework to be surrounded in gravel.
  - New concrete surround to be formed in c40 concrete and finished as per the specification.
  - New flap valve to installed to pipe outlet.
  - New retaining walls to be installed by driving armco barriers as per design.
  - Horizontal armco barrier to be installed and fixed to newly installed vertical piles to hold in place.
  - Area backfilled with as dug material compacted in layers of 300mm using suitable weight compactor.
  - Geotextile to be installed to base of new platform.
  - New access level concrete platform to be installed as per the drawing.
  - New handrails to be installed fixed into concrete with 600mm access gap left.
  - All surrounding areas to be dressed using excavator back to existing.
- Access and Egress to the works area will be restricted to authorised personnel only. Site access to be via main entrance.

**Plant and Equipment:**

- 8t excavator
- 6t dumper
- Plate compactor
- CAT & Genny
- Hand tools.
- 110v Tools
- Petrol mixer

**Materials:**

- Concrete
- Pipe
- Band seal couplings
- Armco barrier
- Handrail system
- Timber shuttering
- Reinforcing steel
- Flap valve

- (i) Potential impacts the works may have (including details of areas of concern e.g designated conservation and shellfish harvesting areas) and proposed mitigation in response to potential impacts (continue on separate sheet if necessary):

Noise, dust & vibration - Contractor to use noise and vibration suppression. Contractor to ensure minimal debris from work falls into watercourse.

Hazardous Materials - Contractor should comply with COSHH regulations. Operatives to be well briefed in site induction.

## 6. Deposits and/or Removals

(a) **Permanent** substance(s) or object(s) to be deposited and/or removed from below MHWS (continue on a separate sheet if necessary):

Type of Deposit/Removal	Deposits		Removals	
	Description	Quantity & Dimensions (metric)	Description	Quantity & Dimensions (metric)
Steel/Iron	Installation of new flap valve.  Safety chains and rails	No.	Removal of existing flap valve.	1 No.
		Dimensions		Dimensions 600mm diameter
		16kg Weight (kg/tonnes)		14.3kg Weight (kg/tonnes)
Timber		No.		No.
		Dimensions		Dimensions
		Weight (kg/tonnes)		Weight (kg/tonnes)
Concrete	Base to pipe surrounds and external maintenance slab. To surround 300mm slab. To surround 600mm pipe. Handrail foundation, running along top front edge of vertical Armco barrier. Blinding to concrete bases,	No.		No.
		Dimensions 7m <sup>3</sup>		Dimensions
		Weight (kg/tonnes) 2,600 kg		Weight (kg/tonnes)
Plastic/Synthetic	Plastic barriers	15.3 m <sup>2</sup>		m <sup>2</sup>
Clay (< 0.004 mm)	Material won on site, laid and compacted in 300mm layers. Geotextile barrier between site won fill material and Type 1 fill, allow for laps as per manufacturers guidance	Volume 24.1(m <sup>3</sup> )	Excavate and store material allowing for re-use of site won material and landscaping remainder on-site.	Volume 43.8 (m <sup>3</sup> )
		44,000kg Weight (kg/tonnes)		79,987.8kg Weight (kg/tonnes)
Silt (0.004 ≤ Silt < 0.063 mm)	Type 1 to surround 600mm diameter pipe	Volume 1.0 (m <sup>3</sup> )		Volume (m <sup>3</sup> )
		2.1 tonnes Weight (kg/tonnes)		Weight (kg/tonnes)
Sand (0.063 ≤ Sand < 2.0 mm)		Volume (m <sup>3</sup> )		Volume (m <sup>3</sup> )
		Weight (kg/tonnes)		Weight (kg/tonnes)

Gravel ( $2.00 \leq \text{Gravel} < 64.0 \text{ mm}$ )		Volume ( $\text{m}^3$ )		Volume ( $\text{m}^3$ )
		Weight (kg/tonnes)		Weight (kg/tonnes)
Cobbles ( $64.0 \leq \text{Cobbles} < 256.0 \text{ mm}$ )		Volume ( $\text{m}^3$ )		Volume ( $\text{m}^3$ )
		Weight (kg/tonnes)		Weight (kg/tonnes)
Boulders ( $\geq 256.0 \text{ mm}$ )		Volume ( $\text{m}^3$ )		Volume ( $\text{m}^3$ )
		Weight (kg/tonnes)		Weight (kg/tonnes)

Pipe	Supply and install 600mm dia. steel pipe to end of cut pipe to act as a movement joint,	1.2m Length (m)	Removal of 1.4m section of 600mm pipe.	1.4m Length (m)
		600mm External Diameter		600mm External Diameter
Other (please describe below):				

(b) Method of delivery of substance(s) or object(s):

Bulk materials and equipment will be delivered by tipper or flatbed with Hiab to a suitable lay down area adjacent to Newton Road and located sufficiently above the MHWS. Transfer to the working area will then be carried out via tracked excavator and/or wheeled dumper to the MHWS with any transfer of material undertaken below the MHWS carried out via hand or by plant remaining above the MHWS wherever possible.

(c) F

or work involving salt marsh feeding, beach replenishment or land reclamation please provide the following information relating to the substance(s) or object(s) to be deposited:

Quantity (tonnes):

tonnes

Nature of substance(s) or object(s) (e.g. sand, silt, gravel etc.):

Source (if sea dredged state location of origin)

Particle size:

Have the substance(s) or object(s) been chemically analysed?

YES  NO

If YES, please include the analysis data with your application

(d) **Temporary** substance(s) or object(s) to be deposited below MHWS (continue on a separate sheet if necessary):

Type of Deposit	Description	Quantity & Dimensions (metric)
Steel/Iron	Temporary Cofferdam needed during periods of work to allow safe working area. 1 metre/1.5 metre height.	1 No.
		Approx. 20 metres worth Dimensions
		Approx 143,560kg Weight (kg/tonnes)
Timber		No.
		Dimensions
		Weight (kg/tonnes)

Concrete		No.
		Dimensions
		Weight (kg/tonnes)
Plastic/Synthetic		m <sup>2</sup>
Clay ( $< 0.004$ mm)		Volume (m <sup>3</sup> )
		Weight (kg/tonnes)
Silt ( $0.004 \leq \text{Silt} < 0.063$ mm)		Volume (m <sup>3</sup> )
		Weight (kg/tonnes)
Sand ( $0.063 \leq \text{Sand} < 2.0$ mm)		Volume (m <sup>3</sup> )
		Weight (kg/tonnes)
Gravel ( $2.00 \leq \text{Gravel} < 64.0$ mm)		Volume (m <sup>3</sup> )
		Weight (kg/tonnes)
Cobbles ( $64.0 \leq \text{Cobbles} < 256.0$ mm)		Volume (m <sup>3</sup> )
		Weight (kg/tonnes)
Boulders ( $\geq 256.0$ mm)		Volume (m <sup>3</sup> )
		Weight (kg/tonnes)
Pipe		Length (m)
		External Diameter (cm/m)
Other (please describe below):		

**7. Disposal of Dredged Substance(s) or Object(s) at Sea**

(a) Do you intend to apply for a marine licence for sea disposal of dredged substance(s) or object(s) as part of the project?

YES  NO

If **YES**, please specify nature of substance(s) or object(s) (e.g sand, gravel, silt, clay, rock etc.):

(b) Quantity of substance(s) or object(s) (wet tonnes):

wet tonnes

**A separate marine licence application will be required to be submitted for sea disposal.**

**8. Noise Monitoring**

Will loud, low to mid frequency (10Hz to 10kHz) impulsive noise be produced by the project? YES  NO

If **YES**, which please indicate the noise generating activities and sound frequencies:

Noise Generating Activity	Sound Frequency (Hertz)
Use of Explosives	
Use of Accoustic Deterrent Devices	
Piling	
Other (please describe below):	

If you have ticked **YES**, please complete the Noise Registry – Initial Registration form located at: <http://www.scotland.gov.uk/Topics/marine/science/MSInteractive/Themes/noise-reduction>

**Marine licence applications will not be accepted until this form has been completed and submitted.**

**9. Statutory Consenting Powers**

Do you, or (if appropriate) your client, have statutory powers to consent any aspect of this project?

No	
----	--

**10. Scotland’s National Marine Plan**

Have you considered the application with reference to Scotland’s National Marine Plan? YES  NO

If **YES**, provide details of considerations made with reference to the policies, including but not limited to General Policies 7 and 13 (GEN 7 and GEN 13), that have been considered:

The potential impact of noise and vibration (GEN 13) has been contemplated and the methodology that has been chosen is designed to restrict the transmission of noise in the marine environment. There is no rock breaking and excavation will be undertaken at a low tide.

The development is specially constructed to prevent the spill of treated effluent onto the shore which will lead to social advantages for residents and guests (GEN 3). As the outfall is designed to be submerged it is not susceptible to inundation and will not increase coastal flooding elsewhere (GEN 8).

The development will not lead to any decrease in marine water quality (GEN12). There may be an improvement as replacement of the outfall will ensure it once again meets its design parameters for initial dilution and dispersion.

As this is a replacement to the existing outfall there will be no adverse visual impact (GEN 7) and there will be no increase in impacts (GEN 21).

In alignment with GEN 9 there will be no substantial harm of the designated species and habitats of the Tay Estuary.

**If NO**, please provide an explanation of why you haven't considered the National Marine Plan?

**11. Pre-Application Consultation**
