Moray West OfTI Marine Licence MS-00009813 Variation Application

Dear Becca,

Moray Offshore Windfarm (West) Limited (Moray West) is seeking to vary the Moray West Offshore Transmission Infrastructure Marine Licence (MS-00009813) granted on 11 April 2022 under the Marine (Scotland) Act 2010 and the Marine and Coastal Access Act 2009.

The proposed amendment included in this variation request is to amend the description of the construction materials used under Section 2.3 of the Marine Licence to include stone/rock/gravel in the size range of 15 – 400 mm, rather than 15 – 200 mm as is currently permitted. No other variations are requested.

An extract of the wording of the OfTI Marine Licence with the proposed change to the relevant section shown as red text (text to be removed) and bold green italics (text to be added) is provided below.

This variation application is accompanied by an environmental report that describes in greater detail the variation request, the background of why the request is being made, and considers the potential environmental effects of the variation request relative to the Moray West EIA and currently consented parameters.

I trust that the information provided in this letter, accompanying Marine Licence variation application form and the below marked up Moray West OfTI Marine Licence (with requested deletion in red and addition in green) is sufficient to enable MD-LOT to vary the OfTI Marine Licence.

Should you require any further information please do not hesitate to contact me.

Yours sincerely

[Redacted]

Pete Geddes

Project Director

MS-00009813

2.3 Description of the construction materials used and Substances and Objects deposited

This licence authorises the deposit of the undemoted substances and objects and the use of the undemoted construction materials required in connection with the Works, subject to the maximum amounts as specified below:

Construction Materials

Quantities detailed below are indicative only.

Steel/Iron	20,000 tonnes
Plastic/Synthetic	2,000 tonnes
Sand	200,000 m ³
Stone/Rock/Gravel (<i>quantity includes total scour protection for the export cables and jacket legs, made up of stone or rock or gravel</i>)	130,000 m ³ (size range = 15-200 400 mm)
Concrete	40,000 m
Export cables	130,000 m
Concrete bags/mattresses	67,500 m ³

Deposits

Moorings to support construction activities
