Dear Ms Sweeting,

Re: Tarbert Ferry Terminal Upgrade - Construction Licence Variation – 06907/19/0

With regard to the construction licence for the Tarbert Ferry Terminal Upgrade, Caledonian Maritime Assets Ltd would like to request a variation to licence number 06907/19/0. The full reasons for the variation and the environmental implications of the variation are detailed in the attached report.

For clarity the variation to the licence requested is to change the materials and quantities in Section 2.5 under the header 'Materials to be used in temporary construction'. The requested new list of materials is as follows:

- Boulders – 216t
- Cobble – 7920t
- Gravel – 1980t
- Steel - 200t
- Concrete - 360t
- Plastic / Synthetic - 10t

If you require any additional information or clarifications, then please do not hesitate to contact myself.

Kind regards
